4. Move both preset and user sample folders to the locations below

	Mac	Windows
Preset Folder “GL2” (15 files)	User/Library/Audio/Presets/Steinberg Media Technologies/Padshop/	C:\Users\[User Name]\My Documents\VST3 Presets\Steinberg Media Technologies\Padshop\
User Sample Folder “Granular Lite 2” (7 files)	User/Documents/Steinberg/Padshop/ Samples/User Samples/	C:\Users\[User Name]\My Documents\Steinberg\Padshop\ Samples\User Samples\
<p><u><i>Special notes to PadShop users</i></u>  <i>You may not be able to find this location in your system. Please first create the file directories before moving the “Granular Lite 2” folder there.</i></p>		

5. Add an Instrument track - “PadShop” or “PadShop Pro”
6. Select “load presets” after the PadShop GUI opens
7. Tick the box next to “GL2” in the “Location Tree” and the system will scan the folder once

- After the scan, click the folder name "GL2" and all the presets will be shown in the previewer (located at the right hand side)

- This is how the user samples folder looks like after installing (PadShop Pro only)

10. PadShop users will not be able to see the samples in the PadShop GUI but it will not affect the usage once the presets are loaded.
