About Violinse

Deconstructing Boundaries And Building Creativity!

Violinse for Padshop 2 marks the beginning of an innovative orchestral FX string expansion series, transforming violin articulations and percussive hits from the instrument's top plate, pegs, and bridge into cinematic tools. This collection offers evolving pads, re-synthesized comps and chromatic percussion, and orchestral FX such as risers, glissandi, and clusters, alongside dark cinematic soundscapes, string and percussive rhythmic suites. Designed for science fiction, epic thrillers or horror genres, Violinse unlocks a palette of apocalyptic and ethereal creativity for sound designers, film and trailer composers!

Features

- 450 new creative presets for Padshop 2
- 215 manipulated stereo samples
- Toolkit for sound designers, film and trailer composers
- All presets designed by Gary Gibbons from Online Music Foundry
- Exclusive expansion for Padshop 2

Compatibility

Violinse VST Sound Instrument Set is an expansion pack for Steinberg's Padshop 2, a Granular and Spectral Synthesizer.

* For Non-Padshop 2 users – This product is not compatible with Padshop or Padshop Pro.
